

Video Title: Study Abroad

Date: April 24, 2018

Running Time: 1:42

Time	Content
0:02 – 0:16	[Shots of different countries] I think every student should at least have one transformative experience in their undergraduate career. It could be a class that you took, a professor who you found really wonderful, a book that you read that totally transforms your worldview –
0:17 – 0:20	[Interview with Dr. George Bragues] but I would say a great candidate for a transformative experience is definitely Study Abroad.
0:21 – 0:23	[Guelph-Humber Logo]
0:24 – 0:32	[Interview with Dr. George Bragues] Our students can visit the Colosseum in Rome, the Vatican, they can go to the Galapagos Islands
0:33 – 0:46	[Shots of different countries] and be at the place where Darwin came up with the theory of evolution. Students can see the Eiffel Tower, the Louvre Museum, in Singapore they can see the mix of an ancient Eastern civilization combined with a
0:47 – 0:50	[Interview with Dr. George Bragues] modern society with skyscrapers and commerce –
0:51 – 0:55	[Shot of different cities around the world] but over the years we've gone to locations that are on postcards everywhere.
0:56 – 1:00	[Interview with Dr. George Bragues] They can actually see a kind of textbook
1:01 – 1:11	[Shots of different countries and culture] in action. They are able to use all five senses to really get a feel for the country. Our students get something that they would otherwise not be able to get by just going on a typical tour with
1:12 – 1:38	[Interview with Dr. George Bragues] someone else, they get access to people in that country, to organizations in that country, that are not part of the usual touristic itinerary and as a result they get

insights that are invaluable and that could help them out in their future career aspirations. I hope that our students come away with an openness to other possibilities, other vistas, other perspectives and a willingness to integrate that into the way they view the world and live their lives.

1:39 – 1:42
